CYBERSECURITY

INFOGRAPHIC

PASSWORDS

Create strong and unique passwords for each account, and use a password manager to keep track of them.

MFA

Enable multi-factor authentication (MFA) wherever possible.

PATCH

Keep your software up to date to patch security vulnerabilities.

ANTI-VIRUS

Use antivirus and antimalware software to protect against viruses and other malicious software.

VPN

Use a virtual private network (VPN) when connecting to public Wi-Fi networks.

CYBERSMART

Be cautious of phishing scams and never click on suspicious links or download attachments from unknown sources.

BACKUP

Backup your important data regularly to protect against data loss due to ransomware or other attacks.

PERSONAL INFORMATION

Limit the amount of personal information you share online, and be careful of social engineering attacks.
